

# Data Structure Tutorial

Welcome to the Data Structure Tutorial. This tutorial is designed to help you learn about data structures and how to use them. This tutorial is designed for those who have a basic understanding of Python and programming concepts. If you are new to programming, you may want to start with a different tutorial.

- [Tree](#)

Each module will contain descriptions and examples. At the end of each module, you will find a problem to solve on your own. You should only look at the solution after you have attempted to solve the problem on your own and you want to check your work.
